**The Architecture of Trees** Cesare Leonardi,Franca Stagi,2019-03-26 Any landscape architect worth their soil should pick up *The Architecture of Trees*, an all-encompassing atlas of all things tree-related.—*The Architect's Newspaper* Gorgeous, large format volume shows each hand-drawn illustration in stunning detail. *The Architecture of Trees* is the result of over twenty years of dedicated study by landscape architects Cesare Leonardi and Franca Stagi. This new edition preserves the original magnificent illustrations and text, translated into English for the first time. Features more than 550 exquisite quill-pen drawings. Each of the 212 tree species are drawn to a scale of 1:100, with and without foliage. Complete with tables of seasonal color variation and projections of shadows cast during the hours of daylight and season by season, no other book contains such detailed and scientific drawings of trees. A legendary and unsurpassed botanical masterwork. Considered a standard in many landscape architecture firms, the drawings, essays, and detailed charts are essential for large scale landscaping projects and a helpful tool for backyard renovations. Landscape designers will think in new ways about the effect of seasons and the time of day on trees, and anyone interested in nature and trees will be captivated by the stunning illustrations. **Finding the Mother Tree** Suzanne Simard,2021-05-04 NEW YORK TIMES BEST SELLER • From the world's leading forest ecologist who forever changed how people view trees and their connections to one another and to other living things in the forest—a moving, deeply personal journey of discovery Suzanne Simard is a pioneer on the frontier of plant communication and intelligence; her TED talks have been viewed by more than 10 million people worldwide. In this, her first book, now available in paperback, Simard brings us into her world, the intimate world of the trees, in which she brilliantly illuminates the fascinating and vital truths--that trees are not simply the source of timber or pulp, but are a complicated, interdependent circle of life; that forests are social, cooperative creatures connected through underground networks by which trees communicate their vitality and vulnerabilities with communal lives not that different from our own. Simard writes--in inspiring, illuminating, and accessible ways—how trees, living side by side for hundreds of years, have evolved, how they learn and adapt their behaviors, recognize neighbors, compete and cooperate with one another with sophistication, characteristics ascribed to human intelligence, traits that are the essence of civil societies--and at the center of it all, the Mother Trees: the mysterious, powerful forces that connect and sustain the others that surround them. And Simard writes of her own life, born and raised into a logging world in the rainforests of British Columbia, of her days as a child spent cataloging the trees from the forest and how she came to love and respect them. And as she writes of her scientific quest, she writes of her own journey, making us understand how deeply human scientific inquiry exists beyond data and technology, that it is about understanding who we are and our place in the world.

Which tree was believed to protect you against both lightning and witchcraft? The use of bay tree leaves as a sign of victory by athletes in ancient Greece led to them being subsequently adopted by many others—from Roman emperors to the Royal Marines.
