Not Quite Burned Out But Crispy Around the Edges Sharon Mills Draper, 2001 This collection of inspirational stories and essays is designed to remind teachers why they decided to teach in the first place, and to encourage them to stay in often difficult situations where they are needed.

Pop! Meghan McCarthy, 2011-04-05 Gum. It's been around for centuries—from the ancient Greeks to the American Indians, everyone's chewed it. But the best kind of gum—bubble gum!—wasn't invented until 1928, when an enterprising young accountant at Fler Gum and Candy used his spare time to experiment with different recipes. Bubble-blowing kids everywhere will be delighted with Megan McCarthy's entertaining pictures and engaging fun facts as they learn the history behind the pink perfection of Dubble Bubble.

The Spread the Happiness Approach: Happy Teachers, Happy Classrooms, Better Education Shonette Bason-Wood, 2021-02-07 Both practical and inspiring, this book is designed to empower educators and school leaders to make clear and simple adjustments to their practice for a lasting impact on the happiness and well-being of staff and children and ultimately on academic standards. It includes practical tips and activities to help teachers generate a lasting atmosphere of positivity and happiness in the classroom plus clear strategies to help leaders to embed the Spread the Happiness approach throughout their school and across the curriculum. This book includes detailed case studies, a five-week programme of taster challenges and a section on measuring outcomes and sharing success. The Spread the Happiness approach invites teachers to undertake a 27-day challenge, which encourages problem solving and challenges them to make their immediate workplace happier. It identifies the strengths of adults and children and sets realistic goals to achieve as an individual, as a team and

even as a community. This powerful resource will be of great interest to all teachers and school leaders, as well as trainee teachers and students on leadership or early educational courses.

The Years Before School Vivian Edmiston Todd,Helen Heffernan,1977 Abstract: Educators specializing in early childhood education are increasingly aware that a Projectian-type philosophy is needed in the field. Such a philosophy would include: teaching a child to learn at the conscious level; paralleling instructional and learning theory; facilitating individual motivation by learning experiences with peers and adult guidance; use of preschool teaching to eliminate problems--scholastic, behavioral, and emotional--and the need for remedial programs later in the educational process; and awareness that girls as well as boys need a preschool foundation for whatever career and life-style they may choose. Preschool programs are increasingly important to families that are nuclear rather than extended and where the mother works more often than not. Preschool programs should aid in the eventual development of a just, humanistic person who is able to deal happily and successfully with problems that may arise in his family or his society.

By combining the three main components of a traditional MFA--writing, reading, and community--it teaches you how to craft compelling stories, engage your readers, and publish your work. Inside you'll learn how to: • Set customized goals for writing and learning. • Generate ideas on demand. • Outline your book from beginning to end. • Breathe life into your characters. • Master point of view, voice, dialogue, and more. • Read with a writer's eye to emulate the techniques of others. • Network like a pro, get the most out of writing workshops, and submit your work successfully. Writing belongs to everyone--not only those who earn a degree. With DIY MFA, you can take charge of your writing, produce high-quality work, get published, and build a writing career.
