Get Your House Right Marianne Cusato, Ben Pentreath, Richard Sammons, Leon Krier, 2011-08-09 Even as oversized McMansions continue to elbow their way into tiny lots nationwide, a much different trend has taken shape. This return to traditional architectural principles venerates qualities that once were taken for granted in home design: structural common sense, aesthetics of form, appropriateness to a neighborhood, and even sustainability. Marianne Cusato, creator of the award-winning Katrina Cottages, has authored and illustrated this definitive guide to what makes houses look and feel right—to the eye and to the soul. She teaches us the language and grammar of classical architecture, revealing how balance, harmony, and detail all contribute to creating a home that will be loved rather than tolerated. And she takes us through the do's and don'ts of every element of home design, from dormers to doorways to columns. Integral to the book are its hundreds of elegant line drawings—clearly rendering the varieties of lintels and cornices, arches and eaves, and displaying “avoid” and “use” versions of the same elements side by side.

Catfish and Mandala Andrew X. Pham, 2000-09-02 Winner of the Kiriya Pacific Rim Book Prize A New York Times Notable Book of the Year Winner of the Whiting Writers' Award A Seattle Post-Intelligencer Best Book of the Year Catfish and Mandala is the story of an American odyssey--a solo bicycle voyage around the Pacific Rim to Vietnam--made by a young

Vietnamese-American man in pursuit of both his adopted homeland and his forsaken fatherland. Andrew X. Pham was born in Vietnam and raised in California. His father had been a POW of the Vietcong; his family came to America as boat people. Following the suicide of his sister, Pham quit his job, sold all of his possessions, and embarked on a year-long bicycle journey that took him through the Mexican desert, around a thousand-mile loop from Narita to Kyoto in Japan; and, after five months and 2,357 miles, to Saigon, where he finds nothing familiar in the bombed-out darkness. In Vietnam, he's taken for Japanese or Korean by his countrymen, except, of course, by his relatives, who doubt that as a Vietnamese he has the stamina to complete his journey (Only Westerners can do it); and in the United States he's considered anything but American. A vibrant, picaresque memoir written with narrative flair and an eye-opening sense of adventure, *Catfish and Mandala* is an unforgettable search for cultural identity.

The Informed Gardener Linda Chalker-Scott,2013-03-01 Winner of the Best Book Award in the 2009 Garden Writers Association Media Awards Named an Outstanding Title in University Press Books for Public and Secondary School Libraries, 2009 In this introduction to sustainable landscaping practices, Linda Chalker-Scott addresses the most common myths and misconceptions that plague home gardeners and horticultural professionals. Chalker-Scott offers invaluable advice to gardeners gardeners who have wondered: Are native plants the best choice for sustainable landscaping? Should you avoid disturbing the root ball when planting? Are organic products better or safer than synthetic ones? What is the best way to control weeds-fabric or mulch? Does giving vitamins to plants stimulate growth? Are compost teas effective in controlling diseases? When is the best time to water in hot weather? If you pay more, do you get a higher-quality plant? How can you

differentiate good advice from bad advice? The answers may surprise you. In her more than twenty years as a university researcher and educator in the field of plant physiology, Linda Chalker-Scott has discovered a number of so-called truths that originated in traditional agriculture and that have been applied to urban horticulture, in many cases damaging both plant and environmental health. The *Informed Gardener* is based on basic and applied research from university faculty and landscape professionals, originally published in peer-reviewed journals. After reading this book, you will: Understand your landscape or garden plants as components of a living system Save time (by not overdoing soil preparation, weeding, pruning, staking, or replacing plants that have died before their time) Save money (by avoiding worthless or harmful garden products, and producing healthier, longer-lived plants) Reduce use of fertilizers and pesticides Assess marketing claims objectively This book will be of interest to landscape architects, nursery and landscape professionals, urban foresters, arborists, certified professional horticulturists, and home gardeners. The See-Through House Shelley Klein, 2020-04-23 'A charming account of a daughter, a house and a fastidious dad' Sunday Times Shelley Klein grew up in the Scottish Borders, in a house designed on a modernist open-plan grid. With colourful glass panels set against a forest of trees, it was like living in a work of art. Her father, Bernat Klein, was a textile designer whose pioneering colours and textures were a major contribution to 1960s and 70s style. Thirty years on, Shelley moves back home to care for her father, now in his eighties: the house has not changed and neither has his uncompromising vision - or his distinctive way of looking at the world. Told with great tenderness and humour, this is Shelley's account of looking after an adored yet maddening parent and a piercing portrait of the grief that followed his death. 'A sad, funny, utterly fascinating book about families, home and how to say goodbye' Mark Haddon 'Original, moving and bracingly honest... often hilarious' Blake Morrison, Guardian 'It is strange that grief should produce such a life-affirming book, but it has. Read it for the solace it contains, or for its captivating descriptions. Either way, it's a delight' Telegraph

Inventing the New American House Stuart Cohen, 2015-04-14 Howard Van Doren Shaw designed stately country houses in and around Chicago—from affluent Lake Forest, Illinois, and Lake Geneva, Wisconsin, to Iowa, Minnesota, Ohio, and Indiana—from 1894 to 1926, a period in American architecture that spanned the Gilded Age, the adoption of Beaux-Arts classicism as the ideal for civic architecture, the invention of the skyscraper, and the beginning of modernism. Born in 1869, he worked for the leading industrialists of that period, including Reuben H. Donnelley of printing fame, newspaper giant Joseph Medill Patterson, Edward Forster Swift, the meatpacking king, and Edward L. Ryerson of Ryerson Steel. A contemporary of Frank Lloyd Wright, Shaw explored many of the same ideas as the Prairie School Architects within the forms of traditional architecture. Though he was recognized as one of the leading country house architects of the early twentieth century, his name was largely forgotten after his death. Like many traditional architects practicing today, Shaw was skilled at adapting historic precedents to suit contemporary living, in particular the easy flow of interior space that became a design hallmark of the period for traditionalists and modernists alike. For the new and fashionable suburb of Lake Forest, Shaw created Market Square, the town center, which was lauded for its design as both a unique town green and the first American shopping center designed to accommodate automobiles. This timely reappraisal of Howard Van Doren Shaw's work features many previously unpublished images from the Shaw Archive in the Burnham and Ryerson Library at the Art Institute of Chicago and the Chicago History Museum, rare construction drawings, and new color photography as well as a catalogue of Shaw's residential work. His legacy includes substantial houses in prosperous communities, many of which are still standing—including Ragdale, once Shaw's own summer house in Lake Forest, now home to the prestigious artists' community; the Becker Estate on Chicago's North Shore; and The Hermann House overlooking Lake Michigan.
