The Geometry of Hand-Sewing Natalie Chanin,2018-05-15 This sewing guide reveals a breakthrough method to simplify learning stitches of all kinds, with more than 100 stitches from the simple to the fanciful. As makers, we tend to learn different stitches over time without thinking much about how they relate to one another. But when Natalie Chanin and her teams at Alabama Chanin and The School of Making began to look at needlework closely, they realized all stitches are based on geometric grid systems. They also discovered that learning new stitches—even elaborate ones—became simple and easy when using grids as guides. In The Geometry of Hand-Sewing Chanin presents their breakthrough method, featuring illustrated instructions (for both right- and left-handed stitchers) for more than 100 stitches—from the basic straight and chain to complex feather and herringbone. Photos of both right and wrong sides are included, as well as guidelines for modifying stitches to increase one’s repertoire further. The book also offers downloads for two stitching cards with the grids on which every stitch in the book is based. These printable cards can be used as stencils for transferring grids to fabric.

The first section, 'Homes Unstyled', sets out Emily's manifesto for creating a stylish home that is beautiful but lived in. *A Home is Never Done* advocates allowing your space to evolve gradually so it is an ever-changing expression of your tastes and interests. *Work with What You've Got* suggests ways to make the most of the home you have rather than yearning for unattainable perfection. *Signs of Life* offers ideas for wrangling papers, clutter and other stuff. *Creative Clutter* tackles collections and displays, while *Break the Rules* rejects style diktats and shows how individuality can bring a home to life. The second section, 'People Live Here', visits real-life homes that are definitely not perfect yet display incredible style and creativity and reflect their owners' needs, tastes and style. And throughout the book, quick fixes, DIY makes and 'Every Home Should Have...' boxes offer creative solutions with unique results.

The Sheltering Sky Paul Bowles, 1981 A beautiful 65th anniversary paperback edition of the landmark literary work by acclaimed author Paul Bowles. In this classic work of psychological terror, Paul Bowles examines the ways in which Americans apprehend an alien culture--and the ways in which their incomprehension destroys them. The story of three American travelers adrift in the cities and deserts of North Africa after World War II, *The Sheltering Sky* is at once merciless and heartbreaking in its compassion. It etches the limits of human reason and intelligence--perhaps even the limits of human life--when they touch the unfathomable emptiness and impassive cruelty of the desert.

Lampshades - How to Make Them Olive Earle, 2008-11 LAMPSHADES HOW TO MAKE THEM by OLIVE EAKLE WITH ILLUSTRATIONS. Originally published in 1921. FOREWORD: The purpose of this book is to make the art of shading lamps and candles a little less of a problem to the amateur craftsman and it is hoped, also, that those who have already had some experience as shade makers, will find some practical hints that will be of value to them. Miss M. L. Morey, who is well-known as a designer and maker of lampshades, has given me the solution to many of the problems that beset the beginner. Of course, the subject is so many-sided that it is quite possible that some point of vital importance to some one particular worker, may not seem to have been given enough attention. Any further details of any phase of shade making, that may be needed, will be supplied gladly upon application to either Miss Morey or myself. Also information as to the where and the how to buy materials will be furnished to the craftsman who is unable to obtain supplies locally. It is suggested that the book be read as a whole, rather than the instructions be used from a single chapter, which, from its heading, apparently contains all the needed information. To have each chapter complete in itself would have entailed endless repetition, as, for instance, many of the suggestions for paper shades are interchangeable with the hints on silk shade making therefore, the best plan is to read the whole book and note details in each chapter that will be of assistance in the construction of the planned lamp. It is taken for granted that the sewing terms used will be understood by the needlewoman who tries her hand at shade making and fortunately there are so few technical terms used in the craft that it is not necessary to spatter the pages with explanatory footnotes. It is hoped that the rough diagrams will make clear some of the confusing points. With patience, careful workmanship and good taste, as fine a lampshade as money can buy, can be produced at a fraction of the cost of those offered in the stores. OLIVE EAKLE. Jan., 1921.
