The Creative Edge Mary C. Fletcher, 2019-04-17 Library facilitators of art-based creativity sessions will learn how to choose materials and art experiences appropriate for young people from toddlers to teens and for intergenerational groups. In the modern world, innovative and creative individuals have a distinct advantage: the creative edge. *The Creative Edge* explains how you can design and conduct art-based creativity programming in your library. Written by a library creativity specialist, this book is the result of the author's many years of experience facilitating art groups for all ages. Her programs have achieved national recognition and will serve as a guide for others to establish art-based creativity sessions. In this book, she incorporates research that documents the importance of creativity as an essential component of childhood development and connects it to library learning goals, including literacy. Creativity research can be applied in libraries and at other public institutions to develop programs that will meet the needs of the next generation. The book includes many practical elements, such as lists for recommended art materials, step-by-step instructions on setup and procedures, and ideas inspired by picture book illustrations that connect to story time themes. *The Creative Edge* teaches readers how to provide programs that promote child-led exploration, experiential learning, innovative thought, and creative confidence.

Inside the White Cube Brian O'Doherty, 1999 These essays explicitly confront a particular crisis in postwar art, seeking to examine the assumptions on which the modern commercial and museum gallery was based.

Off the Walls, 2020-09-22 When life (in a global pandemic) imitates art . . . Van Gogh's *Starry Night* made out of spaghetti? *Cat with a Pearl Earring*? Frida Kahlo self-portraits with pets and toilet paper? While the world reeled from the rapid spread of the novel coronavirus (COVID-19), thousands of people around the globe, inspired by challenges from Getty and other museums, raided toy chests, repurposed pantry items, and enlisted family, roommates, and animals to re-create famous works of art at home. Astonishing in their creativity, wit, and ingenuity, these creations remind us of the power of art to unite us and bring joy during troubled times. *Off the Walls: Inspired Re-Creations of Iconic Artworks* celebrates these imaginative re-creations, bringing highlights from this challenge together in one whimsical, irresistible volume. Getty Publications will donate all profits from the sales of this book to a charity supporting art and artists.

Beyond Objecthood James Voorhies, 2017-02-24 The rise of the exhibition as critical form and artistic medium, from Robert Smithson's antimodernist non-sites in 1968 to today's institutional gravitation toward the participatory. In 1968, Robert Smithson reacted to Michael Fried's influential essay "Art and Objecthood" with a series of works called non-sites. While Fried described the spectator's connection with a work of art as a momentary visual engagement, Smithson's non-sites asked spectators to do something more: to take time looking, walking, seeing, reading, and thinking about the combination of objects, images, and texts installed in a gallery. In *Beyond Objecthood*, James Voorhies traces a genealogy of spectatorship through the rise of the exhibition as a critical form—and artistic medium. Artists like Smithson, Group Material, and Michael Asher sought to reconfigure and expand the exhibition and the museum into something more active, open, and democratic, by inviting spectators into new and unexpected encounters with works of art and institutions. This practice was sharply critical of the ingrained characteristics long associated with art institutions and conventional exhibition-making; and yet, Voorhies finds, over time the critique has been diluted by efforts of the very institutions that now gravitate to the "participatory." *Beyond Objecthood* focuses on innovative figures, artworks, and institutions that pioneered the exhibition as a critical form, tracing its evolution through the activities of curator Harald Szeemann, relational art, and New Institutionalism. Voorhies examines recent artistic and curatorial work by Liam Gillick, Thomas Hirschhorn, Carsten Höller, Maria Lind, Apolonija Šušteršič, and others, at such institutions as Documenta, e-flux, Manifesta, and Office for Contemporary Art Norway, and he considers the continued potential of the exhibition as a critical form in a time when the differences between art and entertainment increasingly blur.

Art Beyond the Gallery in Early 20th Century England Richard Cork, Richard Graham Cork, 1985-01-01 In the early decades of the twentieth century, British art was enlivened by a wide variety of imaginative attempts to take painting and sculpture outside the boundaries of the gallery. Some of the works were commissioned by architects as integral parts of new buildings.

Creativity and Art Margaret A. Boden, 2012-10-25 Margaret Boden presents a series of essays in which she explores the nature of creativity in a wide range of art forms. Creativity in general is the generation of novel, surprising, and valuable ideas (conceptual, theoretical, musical, literary, or visual). Boden identifies three forms of creativity: combinational, exploratory, and transformational. These elicit differing forms of surprise, and are defined by the different kinds of psychological process that generate the new ideas. Boden examines creativity not only in traditional fine art, but also in craftworks, and some less orthodox approaches—namely, conceptual art and several types of computer art. Her Introduction draws out the conceptual links between the various case-studies, showing how they express a coherent view of creativity in art.

Let's Get Creative Jessica Rose, 2024-05-14 Key Selling Points This book explores STEAM topics, and brings art and conservation science together through real-world examples. It discusses environmentalism, sustainability and activism, and asks kids to think about how art and conservation can be and are linked. Encourages young readers to look at art differently and think of it not just as something that hangs on a gallery wall. Includes examples of environmental art from around the world, including the Indigenous Art Park in Edmonton, Earthwork on the shores of Great Salt Lake in Utah, artificial coral reef installations in the Caribbean Sea, the Javits Center in New York City and a tree sculpture in Bristol, England, fitted with solar panels that can charge phones and computers. Encourages young readers to think about their own art as a tool for change. Their art matters and can have an impact beyond the simple enjoyment of making it.

Concerning Stephen Willats and the Social Function of Art Sharon Irish, 2020-12-10 This book on Stephen Willats pulls together key strands of his practice and threads them through histories of British cybernetics, experimental art, and

urban design. For Willats, a cluster of concepts about control and feedback within living and machine systems (cybernetics) offered a new means to make art relevant. For decades, Willats has built relationships through art with people in tower blocks, underground clubs, middle-class enclaves, and warehouses on the Isle of Dogs, to investigate their current conditions and future possibilities. Sharon Irish's study demonstrates the power of Willats's multi-media art to catalyze communication among participants and to upend ideas about "audience" and "art." Here, Irish argues that it is artists like Willats who are now the instigators of social transformation.

The Exhibition and Experience Design Handbook Timothy J. McNeil, 2023-04-04 Today's multi-modal, participatory exhibitions and attractions are bound by a desire to convey information, excite the viewer and create social and narrative experiences. Without design at the helm and employed effectively, these experiential moments would not become lasting memories that inform and inspire an increasingly sophisticated audience. This full-color illustrated handbook, based on the author's research and expertise as an exhibition designer, educator, and critic, is the first title to simultaneously explain how to design exhibitions and attractions successfully; contextualize contemporary exhibition design practice through its historical and theoretical underpinnings; elevate understanding of one of the most rapidly evolving and trans-disciplinary creative disciplines; illuminate exhibition design's contributions to the expanding global market for civic, cultural, commercial and entertainment experiences; and reframe the exhibition design process using a set of recurring tropes and the methods they employ, making this book distinct from other practice-based, museological or commercially-driven titles. This full-color book with over 250 photographs and drawings uses real-world examples, museum and exhibition design studio profiles, historical and contemporary voices, and draw on the author's own creative practice and exhibition making experience, as well as contributions from his extensive network of international museum, attraction, and design professionals. The author introduces a new methodology for understanding exhibition and experience design. One that elevates understanding of one of the most rapidly evolving and trans-disciplinary creative disciplines. Twelve easy-to-follow illustrated chapters introduce a set of reoccurring exhibition design conventions or "tropes" that are omnipresent in exhibition making and can be used to chart a new methodology for understanding exhibition design and its process.

The Move Beyond Form M. Hughes, 2013-03-12 Fictional narratives of the late twentieth century often cross boundaries. This study argues that the undoing of structure in postmodern art form demands a different way of thinking and represents a commentary on the material and social conditions of the late twentieth century and beyond.

Art Therapy and Postmodernism Helene Burt, 2011-09-15 This comprehensive book brings together the voices of

international art therapists with diverse backgrounds and experiences and asks them to consider the role of postmodernism in their understanding of art therapy. These practitioners share a common postmodern belief that art is a unique way of expressing and mediating the human condition and that art therapy should not be a diagnostic tool but a collaborative healing process between the therapist and the client. Drawing on psychotherapy, aesthetics and philosophy, the contributors present current practice, research and case studies and show the many directions and possibilities of postmodern art therapy. This book is an important addition to art therapy theory and will be a crucial text for all art therapy students, academics, researchers and practitioners.

Art beyond Borders Jérôme Bazin, Pascal Dubourg Glatigny, Piotr Piotrowski, 2016-01-01 This book presents and analyzes artistic interactions both within the Soviet bloc and with the West between 1945 and 1989. During the Cold War the exchange of artistic ideas and products united Europe's avant-garde in a most remarkable way. Despite the Iron Curtain and national and political borders there existed a constant flow of artists, artworks, artistic ideas and practices. The geographic borders of these exchanges have yet to be clearly defined. How were networks, centers, peripheries (local, national and international), scales, and distances constructed? How did (neo)avant-garde tendencies relate with officially sanctioned socialist realism? The literature on the art of Eastern Europe provides a great deal of factual knowledge about a vast cultural space, but mostly through the prism of stereotypes and national preoccupations. By discussing artworks, studying the writings on art, observing artistic evolution and artists' strategies, as well as the influence of political authorities, art dealers and art critics, the essays in *Art beyond Borders* compose a transnational history of arts in the Soviet satellite countries in the post war period.

Beyond Wilderness John O'Brian, 2007-09-30 The great purpose of landscape art is to make us at home in our own country was the nationalist maxim motivating the Group of Seven's artistic project. The empty landscape paintings of the Group played a significant role in the nationalization of nature in Canada, particularly in the development of ideas about northernness, wilderness, and identity. In this book, John O'Brian and Peter White pick up where the Group of Seven left off. They demonstrate that since the 1960s a growing body of both art and critical writing has looked beyond wilderness to re-imagine landscape in a world of vastly altered political, technological, and environmental circumstances. By emphasizing social relationships, changing identity politics, and issues of colonial power and dispossession contemporary artists have produced landscape art that explores what was absent in the work of their predecessors. *Beyond Wilderness* expands the public understanding of Canadian landscape representation, tracing debates about the place of landscape in Canadian art and the national imagination through the twentieth century to the present. Critical writings from both contemporary and historically significant curators, historians, feminists, media theorists, and cultural critics and exactly reproduced artworks by contemporary and historical artists are brought together in productive dialogue. *Beyond Wilderness* explains

why landscape art in Canada had to be reinvented, and what forms the reinvention took.
