The Herb in History, Mysteries and Crafts Zenia Sacks DaSilva,2017-05-11 This book is not the usual herbal; not a homeopathic handbook, a cookbook or a gardener's consort; not even a compendium of history or lore, though these are its

favourite pursuits. At heart, it is a tale of humanity's poignant relationship with nature. Told in short vignettes, profusely illustrated and sprinkled with personal asides, it touches broadly on the role of plants in legend, in religion, in medicine, commerce, crafts and tradition, in literature, language, politics, beauty, in the rise and fall of empires, in food and manners, in love, in murder, and in crushing social passions. It selects from the trove of history and science moments that amaze, or shock, or move us to disbelief, and asks us to explore the uncanny bond between us and our non-speaking partners in creation.

Isotope Geochemistry Heinrich D Holland,Karl K. Turekian,2010-09-27 After the discovery that elements were commonly composed of isotopes, there developed a range of studies of the variability of isotopic compositions in Earth materials, which was able to add to our understanding of Earth processes and history. This collection of chapters from the Treatise on Geochemistry describes the range of isotopic studies. The chapters are grouped into the following categories: light stable isotopes, radiogenic tracers, noble gases and radioactive tracers. The first three groups depend on mass spectrometric measurements. The section on radioactive tracers employs both radioactive counting techniques and the newly developed accelerator mass spectrometric techniques. Comprehensive, interdisciplinary and authoritative content selected by leading subject experts Robust illustrations, figures and tables Affordably priced sampling of content from the full Treatise on Geochemistry
