Disabling Barriers Ravi Malhotra, Benjamin Isitt, 2017-10-15 *Disabling Barriers* analyzes issues relating to disability at different moments in Canadian and American history. In this volume, legal scholars, historians, and disability-rights activists explore how disabled people have been portrayed and treated in a variety of contexts, including within the labour market, the workers' compensation system, the immigration process, and the legal system (both as litigants and as lawyers). The contributors encourage us to rethink our understanding of both the systemic barriers disabled people face and the capacity of disabled people to transform their environment by changing the discourse surrounding disablement.

Passing Fancies in Jewish American Literature and Culture Judith Ruderman, 2019-02-01 In *Passing Fancies* Judith Ruderman takes on the fraught question of who passes for Jewish in American literature and culture. In today's contemporary political climate, religious and racial identities are being reconceived as responses to culture and environment, rather than essential qualities. Many Jews continue to hold conflicting ideas about their identity—seeking, on the one hand, deep engagement with Jewish history and the experiences of the Jewish people, while holding steadfastly, on the other hand, to the understanding that identity is fluid and multivalent. Looking at a carefully chosen set of texts from American literature, Ruderman elaborates on the strategies Jews have used to pass from the late 19th century to the present—nose jobs, renaming, clothing changes, religious and racial reclassification, and even playing baseball. While traversing racial and religious identities has always been a feature of America's nation of immigrants, Ruderman shows how the complexities of identity formation and deformation are critically relevant during this important cultural moment.

Losing Ground Jione Havea, 2021-10-08 The *Ruth* narrative opens with a climate crisis - a famine pushed a family to migrate - and addresses some of the critical concerns for refugees: food, security, home, land, inheritance. Around those concerns, *Losing Ground: Reading Ruth in the Pacific* offers a collection of bible studies from the Pacific that interweave the climate pandemic with the interests and wisdoms of Pasifika natives. Weaving *Ruth's* story together with the stories of those who, as Pacific islanders on the frontline of a climate catastrophe, are forced to leave their homes because of rising sea

levels, Pasifika bible scholar Jione Havea offers a powerful and potent contribution which refuses to pretend scripture can be read separately from the every day realities of a climate emergency.

Warring with Words Michael Hanne,William D. Crano,Jeffery Scott Mio,2014-08-01 Scholars in many of the disciplines surrounding politics explicitly utilize either a narrative perspective or a metaphor perspective (though rarely the two in combination) to analyze issues -- theoretical and practical, domestic and international -- in the broad field of politics. Among the topics they have studied are: competing metaphors for the state or nation which have been coined over the centuries in diverse cultures; the frequency with which communal and international conflicts are generated, at least in part, by the clashing religious and historical narratives held by opposing groups; the cognitive short-cuts employing metaphor by which citizens make sense of politics; the need for political candidates to project a convincing self-narrative; the extent to which the metaphors used to formulate social issues determine the policies which will be developed to resolve them; the failure of narratives around the security of the nation to take account of the individual experiences of women and children. This volume is the first in which eminent scholars from disciplines as diverse as social psychology, anthropology, political theory, international relations, feminist political science, and media studies, have sought to integrate the narrative and the metaphor perspectives on politics. It will appeal to any scholar interested in the many ways in which narrative and metaphor function in combination as cognitive and rhetorical instruments in discourse around politics.

Future Cities Nick Dunn,Paul Cureton,2020-12-10 What might our cities look like in ten, twenty or fifty years? How may future cities face global challenges? Imagining the city of the future has long been an inspiration for many architects, artists and designers. This book examines how cities of the future have been visualised, what these projects sought to communicate and what the implications may be for us now. It provides a visual history of the future and explores the relationships between different visualisation techniques and ideologies for cities. Thinking about what futures are, who they are for, why they are desirable, and how and when they are to be brought into being is central to this book. Through visualisation we are able to experiment in ways that would be impractical and potentially hazardous in the real world, and this book, therefore, aims to contribute toward a better understanding of the power and agency of visualisations for future cities. In this lavishly illustrated text, the authors apply several critical lenses to consider the subject in different ways: technological futures, social futures, and global futures, providing a comprehensive survey and analysis of visions for future cities, and engaging creatively with how we perceive tomorrow's world and future studies more widely.

Stem Cells Mary Clarke,Jonathan Frampton,2020-07-27 Stem cell science, encompassing basic biology to practical

application, is both vast and diverse. A full appreciation of it requires an understanding of cell and molecular biology, tissue structure and physiology, the practicalities of tissue engineering and bioprocessing, and the pathways to clinical implementation—including the ethical and regulatory imperatives that our society requires us to address. Expectation and debate have been driven by the allure of regenerative medicine using stem cells as a source of replacements for damaged or aged tissues. The potential of stem cell application goes far beyond this. Highly innovative uses of stem cells are emerging as possible therapies for cancers, treating acute damage in conditions such as stroke and myocardial infarction, and resolving a whole range of diseases. *Stem Cells: Biology and Application* presents the basic concepts underlying the fast-moving science of stem cell biology. This textbook is written for an advanced stem cell biology course. The target audience includes senior undergraduates, first year graduate students, and practitioners in molecular biology, biology, and biomedical engineering. *Stem Cells* provides a comprehensive understanding of these unique cells, highlighting key areas of research, associated controversies, case studies, technologies, and pioneers in the field.
