Research Methods for the DBA Françoise Chevalier, L. Martin Cloutier, Nathalie Mitev, 2019-09-20 The thesis completed as part of the Doctorate in Business Administration, called the DBA, requires the candidate to choose from a wide range of research methods and tools so this project can become reality. Determining, choosing, implementing and contextualizing research methods and tools are all crucial steps for the success of the research work undertaken as part of the DBA thesis. The 30 chapters of this book have been prepared to the attention of DBA candidates, to orient and guide them in choosing research methods and tools. The first part raises the question of the choice of research methods; the second one deals with data collection methods; the third part focuses on data analysis methods; and the fourth surveys the contextualization of methods. Written so as to ensure contents are accessible and to foster learning, the chapters provide the foundations and resources to guide methodological choices. This book is the English augmented edition of the French edition published as part of the Business Science Institute collection. The aim is to produce reference books to guide the academic work of

doctoral candidates in the scientific training curriculum of the DBA. The first collective book published in 2015, *The Creation of Knowledge by Managers* (available in French), aimed to establish the main guidelines for this new role assumed by managers in management practice: that of new knowledge producers. Also part of the collection, the book *How to Successfully Complete Your DBA?*, aims to guide the research elaboration and execution of the DBA thesis.

Wattana Chris Herzfeld, 2016-05-02 She likes tea, sews, draws on papers and is a self-taught master of tying and untying knots. But she is not a crafty woman of the DIY set: she is Wattana, an orangutan who lives in the Jardin des Plantes Zoo in Paris. And it is in Paris where Chris Herzfeld first encounters and becomes impressed by Wattana and her exceptional abilities with knots. In *Wattana: An Orangutan in Paris* Herzfeld tells not only Wattana's fascinating story, but also the story of orangutans and other primates—including bonobos, chimpanzees, and gorillas—in captivity. Offering a uniquely intimate look at the daily lives of captive great apes, Herzfeld uses Wattana's life to trace the history of orangutans from their first arrival in Europe in 1776 to the inhabitants of the Zoo of Paris and other zoos today. She provides a close look at the habits, technical know-how, and skills of Wattana, who, remarkably, uses strings, paper rolls, rope, and even pieces of wood to make things. And she thoughtfully explores how apes individually—and often with ingenuity—come to terms with and adapt to their captive environments and caretakers. Through these stories, Wattana sympathetically reveals the extraordinary psychology and distinctive personalities of great apes as well as the interconnections between animal and human lives, especially in zoos. Scientists predict that orangutans will disappear from the wild by 2030, and captive animals like Wattana may, as a result, provide our best chance to understand and appreciate their astonishing intelligence and abilities. Wattana, the accomplished maker of knots, is the hero of this poignant book, which will enthrall anyone curious about the lives of our primate cousins.

Jean-Baptiste Say and Political Economy Jean-Baptiste Say, 2016-11-10 Jean-Baptiste Say (1767-1832) was one of the first great economists to have laid down the foundations of economic science. Author of the famous *Treatise on Political Economy* in 1803, which was revised and re-edited on several occasions, he published numerous other works including a voluminous *Complete Course in Practical Political Economy* in 1828-9. He also taught political economy successively from 1815 until his death in three Parisian establishments: the Athénée, the Conservatory of Arts and Trades, and the Collège de France. The texts in which Say exposes his approach to political economy have not been available in the English language until now except for the fourth edition of the 'Preliminary Discourse' which serves as an introduction to the *Treatise*. This book presents a translation which renders his works accessible to the English speaking world. For the first time, English readers will be able to become directly immersed in Say's principal texts, where he develops his conception of political economy. *Jean-Baptiste Say and Political Economy* proposes a translation of a selection of eleven of Say's texts. The first

three are versions of the 'Preliminary Discourse' from the Treatise's editions of 1803, 1814 and 1826 with the variations of the editions of 1817, 1819 and 1841. The following four texts are the opening discourses pronounced at the Conservatory in 1820 and 1828 and the Collège de France in 1831 and 1832. The eighth text is the 'General Considerations' which open the Complete Course in Practical Political Economy of 1828, with the variations of the 1840 re-edition. The final three texts are those Say devotes to 'the progress of political economy' in what is akin to a history of economic thought. This volume is of great importance to economic historians and people studying Jean-Baptiste Say, as well as those who are interested in economic theory and philosophy and political economy.

Advances in Sequence Analysis: Theory, Method, Applications Philippe Blanchard, Felix Bühlmann, Jacques-Antoine Gauthier, 2014-07-02 This book gives a general view of sequence analysis, the statistical study of successions of states or events. It includes innovative contributions on life course studies, transitions into and out of employment, contemporaneous and historical careers, and political trajectories. The approach presented in this book is now central to the life-course perspective and the study of social processes more generally. This volume promotes the dialogue between approaches to sequence analysis that developed separately, within traditions contrasted in space and disciplines. It includes the latest developments in sequential concepts, coding, atypical datasets and time patterns, optimal matching and alternative algorithms, survey optimization, and visualization. Field studies include original sequential material related to parenting in 19th-century Belgium, higher education and work in Finland and Italy, family formation before and after German reunification, French Jews persecuted in occupied France, long-term trends in electoral participation, and regime democratization. Overall the book reassesses the classical uses of sequences and it promotes new ways of collecting, formatting, representing and processing them. The introduction provides basic sequential concepts and tools, as well as a history of the method. Chapters are presented in a way that is both accessible to the beginner and informative to the expert.

The Paris System for Reporting Urinary Cytology Dorothy L. Rosenthal, Eva M. Wojcik, Daniel F.I. Kurtycz, 2015-12-16 This book describes a novel and proven approach to cytologically classify urinary samples for the detection of bladder cancer and lesions of the upper urinary tract. The new method is based on the collective experience of knowledgeable cytopathologists who have tested the terminology within their own laboratories for reproducibility and predictability of neoplasms of the urinary tract. Accompanying the written criteria for each diagnostic category are meticulously photographed exemplars of the cellular features, with cogently annotated descriptions of the photographs. The book thereby performs as an atlas for microscopists involved in diagnostic cytopathology at all levels of their education. Included in the targeted readership are experienced pathologists, cytotechnologists, and students of both professional groups. The new terminology also considers the clinical aspects of patient management. Written by experts in the field who convened at the 18th International Congress of Cytology in Paris, The Paris System for Reporting Urinary Cytology presents a global standard for reporting and a new

philosophic approach that maximizes the strengths of detecting the potentially lethal high grade lesions by urinary cytology, and recognizes without apology the inability to reliably detect the low grade lesions in urinary cytology. The Concept has been endorsed by the American Society Of Cytopathology, and the International Academy of Cytology.

Algebra Essentials Practice Workbook with Answers: Linear and Quadratic Equations, Cross Multiplying, and Systems of Equations Chris McMullen,2010-07-12 AUTHOR: Chris McMullen earned his Ph.D. in physics from Oklahoma State University and currently teaches physics at Northwestern State University of Louisiana. He developed the Improve Your Math Fluency series of workbooks to help students become more fluent in basic math skills.CONTENTENTS: This Algebra Essentials Practice Workbook with Answers provides ample practice for developing fluency in very fundamental algebra skills - in particular, how to solve standard equations for one or more unknowns. These algebra 1 practice exercises are relevant for students of all levels - from grade 7 thru college algebra. This workbook is conveniently divided up into seven chapters so that students can focus on one algebraic method at a time. Skills include solving linear equations with a single unknown (with a separate chapter dedicated toward fractional coefficients), factoring quadratic equations, using the quadratic formula, cross multiplying, and solving systems of linear equations. Not intended to serve as a comprehensive review of algebra, this workbook is instead geared toward the most essential algebra skills. An introduction describes how parents and teachers can help students make the most of this workbook. Students are encouraged to time and score each page. In this way, they can try to have fun improving on their records, which can help lend them confidence in their math skills.PRACTICE: With no pictures, this workbook is geared strictly toward learning the material and developing fluency through practice.EXAMPLES: Each section begins with a few pages of instructions for how to solve the equations followed by a few examples. These examples should serve as a useful guide until students are able to solve the problems independently.ANSWERS: Answers to exercises are tabulated at the back of the book. This helps students develop confidence and ensures that students practice correct techniques, rather than practice making mistakes.PHOTOCOPIES: The copyright notice permits parents/teachers who purchase one copy or borrow one copy from a library to make photocopies for their own children/students only. This is very convenient if you have multiple children/students or if a child/student needs additional practice.

The Post-War Experimental Novel Andrew Hodgson,2019-10-31 Delving into how the traumatic experience of the Second World War formed - or perhaps malformed - the post-war experimental novel, this book explores how the symbolic violence of post-war normalization warped societies' perception of reality. Andrew Hodgson explores how the novel was used by authors to attempt to communicate in such a climate, building a memorial space that has been omitted from literatures and societies of the post-war period. Hodgson investigates this space as it is portrayed in experimental modern British and French fiction, considering themes of amnesia, myopia, delusion and dementia. Such themes are constantly referred back to and posit in narrative a motive for the very broken forms these books often take - books in boxes; of spare pages to be

shuffled at the reader's will; with holes in pages; missing whole sections of the alphabet; or books written and then entirely scrubbed out in smudged black ink. Covering the works of B. S. Johnson, Ann Quin, Georges Perec, Roland Topor, Raymond Queneau and others, Andrew Hodgson shows that there is method to the madness of experimental fiction and legitimizes the form as a prominent presence within a wider literary and historical movement in European and American avant-garde literatures.
