**R for Everyone** Jared P. Lander, 2017-06-13 Statistical Computation for Programmers, Scientists, Quants, Excel Users, and Other Professionals Using the open source R language, you can build powerful statistical models to answer many of your most challenging questions. R has traditionally been difficult for non-statisticians to learn, and most R books assume far too much knowledge to be of help. R for Everyone, Second Edition, is the solution. Drawing on his unsurpassed experience teaching new users, professional data scientist Jared P. Lander has written the perfect tutorial for anyone new to statistical programming and modeling. Organized to make learning easy and intuitive, this guide focuses on the 20 percent of R functionality you'll need to accomplish 80 percent of modern data tasks. Lander's self-contained chapters start with the absolute basics, offering extensive hands-on practice and sample code. You'll download and install R; navigate and use the R environment; master basic program control, data import, manipulation, and visualization; and walk through several essential tests. Then, building on this foundation, you'll construct several complete models, both linear and nonlinear, and use some data mining techniques. After all this you'll make your code reproducible with LaTeX, RMarkdown, and Shiny. By the time you're done, you won't just know how to write R programs, you'll be ready to tackle the statistical problems you care about most. Coverage includes Explore R, RStudio, and R packages Use R for math: variable types, vectors, calling functions, and more Exploit data structures, including data.frames, matrices, and lists Read many different types of data Create attractive, intuitive statistical graphics Write user-defined functions Control program flow with if, ifelse, and complex checks Improve program efficiency with group manipulations Combine and reshape multiple datasets Manipulate strings using R's facilities and regular expressions Create normal, binomial, and Poisson probability distributions Build linear, generalized linear, and nonlinear models Program basic statistics: mean, standard deviation, and t-tests Train machine learning models Assess the quality of models and variable selection Prevent overfitting and perform variable selection, using the Elastic Net and Bayesian methods Analyze univariate and multivariate time series data Group data via K-means and hierarchical clustering Prepare reports, slideshows, and web pages with knitr Display interactive data with RMarkdown and htmlwidgets Implement dashboards with Shiny Build reusable R packages with devtools and Rcpp Register your product at [informit.com/register](http://informit.com/register) for

**On the Menu** Nicholas Lander,2016-11-03 From the Financial Times's long-standing restaurant critic Nicholas Lander comes this celebration of the history, design and evolution of the world's favourite piece of paper: the menu. On the Menu is a stunning collection of menus, from those at the cutting edge of contemporary culinary innovation, like Copenhagen's Noma, to those that are relics from another time: a 1970s menu from L'Escargot on which all main courses cost less than one pound; the last menu from The French House Dining Room before Fergus Henderson departed for St John; a Christmas feast of zoo animals served during the Siege of Paris in 1870; and three of the world's original restaurant menus—now hanging proudly in London's Le Gavroche. Throughout, Lander examines the principles of menu design and layout; the different rules that govern separate menus for breakfast, afternoon tea and dessert; the evolution of wine and cocktail lists; and how menus can act as records of the past. He reveals insights from interviews with Michael Anthony, Heston Blumenthal, Massimo Bottura, René Redzepi, Ruth Rogers and many more of the most renowned contemporary chefs of our time, who explain how they decide what to serve and what inspires them to create and design their menus. These are truly pages to drool over.

**The Society of Genes** Itai Yanai,Lercher Martin,2016-01-11 Since Dawkins popularized the notion of the selfish gene, the question of how these selfish genes work together to construct an organism remained a mystery. Now, standing atop a

wealth of new research, Itai Yanai and Martin Lercher—pioneers in the field of systems biology—provide a vision of how genes cooperate and compete in the struggle for life.

**Nation Branding** Keith Dinnie, 2015-08-27 *Nation Branding: Concepts, Issues, Practice* was the ground-breaking first textbook to provide an overview of this recently established but fast-growing practice, in which the principles of brand management are applied to countries rather than companies. Many governments have invested in nation branding in order to strengthen their country's influence, improve its reputation, or boost tourism, trade and investment. This new edition has been comprehensively revised and its influential original framework modified to reflect the very latest changes to this still-developing field. It remains an accessible blend of theory and practice rich with international examples and contributions. Updates to this edition: New international cases of countries as diverse as China, United Arab Emirates, Ghana, Cuba, India, Great Britain and many more; New contributions from distinguished scholars, diplomats and businesspeople providing a range of case studies, practitioner insights and academic perspectives; New Companion Website to support the book featuring instructor aids such as PowerPoint presentations for each chapter and an instructor manual; This much-anticipated update to an influential book is an essential introduction to nation branding for students and policy makers.

*How to Make a Spaceship* Julian Guthrie, 2016-09-20 A New York Times bestseller! The historic race that reawakened the promise of manned spaceflight A Finalist for the PEN/E. O. Wilson Literary Science Writing Award Alone in a Spartan black cockpit, test pilot Mike Melvill rocketed toward space. He had eighty seconds to exceed the speed of sound and begin the climb to a target no civilian pilot had ever reached. He might not make it back alive. If he did, he would make history as the world's first commercial astronaut. The spectacle defied reason, the result of a competition dreamed up by entrepreneur Peter Diamandis, whose vision for a new race to space required small teams to do what only the world's largest governments had done before. Peter Diamandis was the son of hardworking immigrants who wanted their science prodigy to make the family proud and become a doctor. But from the age of eight, when he watched Apollo 11 land on the Moon, his singular goal was to get to space. When he realized NASA was winding down manned space flight, Diamandis set out on one of the great

entrepreneurial adventure stories of our time. If the government wouldn't send him to space, he would create a private space flight industry himself. In the 1990s, this idea was the stuff of science fiction. Undaunted, Diamandis found inspiration in an unlikely place: the golden age of aviation. He discovered that Charles Lindbergh made his transatlantic flight to win a \$25,000 prize. The flight made Lindbergh the most famous man on earth and galvanized the airline industry. Why, Diamandis thought, couldn't the same be done for space flight? The story of the bullet-shaped SpaceShipOne, and the other teams in the hunt, is an extraordinary tale of making the impossible possible. It is driven by oversized characters—Burt Rutan, Richard Branson, John Carmack, Paul Allen—and obsessive pursuits. In the end, as Diamandis dreamed, the result wasn't just a victory for one team; it was the foundation for a new industry and a new age.

**The Art of the Restaurateur** Nicholas Lander,2012-09-17 Until 30 years ago, restaurateurs were considered the most important figures in any restaurant's success, with chefs consigned to the kitchen. This process began to change with the elevation of chef-patron Paul Bocuse in the late 1970s, and has continued with the rise of the celebrity chef. Restaurateurs are hugely important but rarely written about and significantly under-appreciated. The profession, other than its commercial and social aspects, has a fundamental human appeal: restaurateurs derive their name and profession from the French verb *restaurer* when their role was to restore the health of travellers battered by the potholes of French roads in the early 19th century. The role has changed a lot since then, and continues to evolve in fascinating ways.

*Real Baby Food* Jenna Helwig,2015 The food editor for Parents magazine gives parents everything they need to cook for babies and toddlers from 6 months to 3 years with 200 fresh, healthy and easy recipes that include nutritional information and address topics ranging from food allergies to picky eaters. Original. 20,000 first printing.

*Black Identities* Mary C. WATERS,2009-06-30 The story of West Indian immigrants to the United States is generally considered to be a great success. Mary Waters, however, tells a very different story. She finds that the values that gain first-generation immigrants initial success--a willingness to work hard, a lack of attention to racism, a desire for education, an incentive to save--are undermined by the realities of life and race relations in the United States. Contrary to long-held beliefs, Waters finds, those who resist Americanization are most likely to succeed economically, especially in the second generation.

World Report 2019 Human Rights Watch,2019-02-05 The best country-by-country assessment of human rights. **The Mars Project** Wernher Von Braun,1953 This classic on space travel was first published in 1953, when interplanetary space flight was considered science fiction by most of those who considered it at all. Here the German-born scientist Wernher von Braun detailed what he believed were the problems and possibilities inherent in a projected expedition to Mars. Today von Braun is recognized as the person most responsible for laying the groundwork for public acceptance of America's space program. When President Bush directed NASA in 1989 to prepare plans for an orbiting space station, lunar research bases, and human exploration of Mars, he was largely echoing what von Braun proposed in The Mars Project.

**Nation branding** Keith Dinnie,2010-05-14 Nation Branding: Concepts, Issues, Practice is a comprehensive and exciting text that demonstrates why nations are embracing the principles of brand management. It clearly explains how the concepts and techniques of branding can be adapted to the context of nations- as opposed to the more usual context of products, services, or companies. Concepts grounded in the brand management literature such as brand identity, brand image, brand positioning, and brand equity, are transposed to the domain of nation branding and supported by country case insights that provide vivid illustrations of nation branding in practice. Nation branding is a means by which more and more nations are attempting to compete on the global stage. Current practice in nation branding is examined and future horizons traced. The book provides: \* The first overview of its kind on nation branding \* A blend of academic theory and real world practice in an accessible, readable fashion \* A clear and detailed adaptation of existing brand theory to the emerging domain of nation branding \* An original conceptual framework and models for nation branding \* A rich range of international examples and over 20 contributions by leading experts from around the world Country case insights on nation branding strategies currently being utilized by nations such as Japan, Egypt, Brazil, Switzerland, Iceland, and Russia Clearly and coherently structured, the book is an essential introduction to nation branding for both students and policymakers and will be an essential text for those interested in this fast growing area.

**The Shikoku Pilgrimage** John Lander,2021-09-29 - Evocative photographs of one of the world's most famous pilgrimages - All 88 temples illustrated and discussed - Includes accounts by former pilgrims The Shikoku Pilgrimage on the island of the same name is one of the few circular pilgrimages in the world. At 1,200 kilometers in length, the trail includes 88 temples and passes through diverse countryside such as idyllic bamboo groves, deserted beaches and ordinary Japanese neighborhoods. There is a long tradition of pilgrimage in Japan, dating back at least to the time of the renowned monk, poet and philosopher Kobo Daishi (774-825) who is particularly associated with this trail. John Lander, long-time resident of Japan, author and photographer, has visited and recorded every temple in evocative images, as well as providing fascinating details about the origin of the trail and what the pilgrimage means to the thousands who undertake it every year. The pilgrimage is undertaken for many reasons - to have a time of reflection away from everyday life, as a spiritual journey or as a healing period after a traumatic life experience. Along the way, pilgrims will encounter ordinary Japanese people and learn to

understand the custom of o-settai, or charitable giving.

**Good Strategy Bad Strategy** Richard Rumelt, 2011-07-19 Good Strategy/Bad Strategy clarifies the muddled thinking underlying too many strategies and provides a clear way to create and implement a powerful action-oriented strategy for the real world. Developing and implementing a strategy is the central task of a leader. A good strategy is a specific and coherent response to—and approach for—overcoming the obstacles to progress. A good strategy works by harnessing and applying power where it will have the greatest effect. Yet, Rumelt shows that there has been a growing and unfortunate tendency to equate Mom-and-apple-pie values, fluffy packages of buzzwords, motivational slogans, and financial goals with “strategy.” In Good Strategy/Bad Strategy, he debunks these elements of “bad strategy” and awakens an understanding of the power of a “good strategy.” He introduces nine sources of power—ranging from using leverage to effectively focusing on growth—that are eye-opening yet pragmatic tools that can easily be put to work on Monday morning, and uses fascinating examples from business, nonprofit, and military affairs to bring its original and pragmatic ideas to life. The detailed examples range from Apple to General Motors, from the two Iraq wars to Afghanistan, from a small local market to Wal-Mart, from Nvidia to Silicon Graphics, from the Getty Trust to the Los Angeles Unified School District, from Cisco Systems to Paccar, and from Global Crossing to the 2007–08 financial crisis. Reflecting an astonishing grasp and integration of economics, finance, technology, history, and the brilliance and foibles of the human character, Good Strategy/Bad Strategy stems from Rumelt’s decades of digging beyond the superficial to address hard questions with honesty and integrity.
