Missile Defense and Defeat Thomas Karako,2017-03-24 The National Defense Authorization Act of 2016 mandates a review of missile defeat policy, strategy, and capability to be completed by January 2018. This upcoming Missile Defeat Review (MDR) represents an opportunity for the Trump administration to articulate a vision for the future of air and missile defense. This collection of expert essays explores how the strategic environment for missile defense and defeat has evolved since 2010 and offers recommendations to help guide and inform the MDR's development.

Poverty and Shared Prosperity 2018 World Bank,2018-12-10 The World Bank Group has two overarching goals: End extreme poverty by 2030 and promote shared prosperity by boosting the incomes of the bottom 40 percent of the population in each economy. As this year's Poverty and Shared Prosperity report documents, the world continues to make progress toward these goals. In 2015, approximately one-tenth of the world's population lived in extreme poverty, and the incomes of the bottom 40 percent rose in 77 percent of economies studied. But success cannot be taken for granted. Poverty remains high in Sub-Saharan Africa, as well as in fragile and conflict-affected states. At the same time, most of the world's poor now live in middle-income countries, which tend to have higher national poverty lines. This year's report tracks poverty comparisons at two higher poverty thresholds—\$3.20 and \$5.50 per day—which are typical of standards in lower- and upper-middle-income countries. In addition, the report introduces a societal poverty line based on each economy's median income or consumption. *Poverty and Shared Prosperity 2018: Piecing Together the Poverty Puzzle* also recognizes that poverty is not only about income and consumption—and it introduces a multidimensional poverty measure that adds other factors, such as access to education, electricity, drinking water, and sanitation. It also explores how inequality within households could affect the global profile of the poor. All these additional pieces enrich our understanding of the poverty puzzle, bringing us closer to solving it. For more information, please visit worldbank.org/PSP

Sepsis Management in Resource-limited Settings Arjen M. Dondorp,Martin W. Dünser,Marcus J. Schultz,2019-02-08 This book is open access under a CC BY 4.0 license. It constitutes a unique source of knowledge and guidance for all

healthcare workers who care for patients with sepsis and septic shock in resource-limited settings. More than eighty percent of the worldwide deaths related to sepsis occur in resource-limited settings in low and middle-income countries. Current international sepsis guidelines cannot be implemented without adaptations towards these settings, mainly because of the difference in local resources and a different spectrum of infectious diseases causing sepsis. This prompted members of the Global Intensive Care working group of the European Society of Intensive Care Medicine (ESICM) and the Mahidol-Oxford Tropical Medicine Research Unit (MORU, Bangkok, Thailand) - among which the Editors - to develop with an international group of experts a comprehensive set of recommendations for the management of sepsis in resource-limited settings. Recommendations are based on both current scientific evidence and clinical experience of clinicians working in resource-limited settings. The book includes an overview chapter outlining the current challenges and future directions of sepsis management as well as general recommendations on the structure and organization of intensive care services in resource-limited settings. Specific recommendations on the recognition and management of patients with sepsis and septic shock in these settings are grouped into seven chapters. The book provides evidence-based practical guidance for doctors in low and middle income countries treating patients with sepsis, and highlights areas for further research and discussion.

The Book of Disappearance Ibtisam Azem, 2019-07-12 What if all the Palestinians in Israel simply disappeared one day? What would happen next? How would Israelis react? These unsettling questions are posed in Azem's powerfully imaginative novel. Set in contemporary Tel Aviv forty eight hours after Israelis discover all their Palestinian neighbors have vanished, the story unfolds through alternating narrators, Alaa, a young Palestinian man who converses with his dead grandmother in the journal he left behind when he disappeared, and his Jewish neighbor, Ariel, a journalist struggling to understand the traumatic event. Through these perspectives, the novel stages a confrontation between two memories. Ariel is a liberal Zionist who is critical of the military occupation of the West Bank and Gaza, but nevertheless believes in Israel's project and its national myth. Alaa is haunted by his grandmother's memories of being displaced from Jaffa and becoming a refugee in her homeland. Ariel's search for clues to the secret of the collective disappearance and his reaction to it intimately reveal the fissures at the heart of the Palestinian question. The Book of Disappearance grapples with both the memory of loss and the loss of memory for the Palestinians. Presenting a narrative that is often marginalized, Antoon's translation of the critically acclaimed Arabic novel invites English readers into the complex lives of Palestinians living in Israel.

Upwelling Ecosystems R. Boje, M. Tomczak, 2012-12-06 Upwelling areas are among the most fertile regions of the ocean. In principle, upwelling is caused by the divergence of the flow in the surface layer of the ocean which arises as a consequence of a particular wind field, the presence of a coastline, or other special conditions. Since deeper oceanic layers are usually enriched with nutrients, it is the permanent supply of nutrients which forms the basis for the high productivity of upwelling regions. The study of upwelling and its consequences were, for a long time, the task of individual scientists from all disciplines of marine science. Today, it is perhaps the branch of oceanography where interdisciplinary cooperation has developed best. Becoming aware of the large potential yield of upwelling regions, governments increased the funds for upwelling research. With research activities developed on a larger scale, interdisciplinary cooperation became a necessity. On the international level, several symposia documented the rapid development. Three volumes reflect the results of these scientific meetings (Rapp. Proc.-Verb. 159, 1970; Inv. Pesq. 35, 1, 1971; Tethys §. 1-2, 1974). The present book contains selected papers from the Third Symposium on Upwelling Ecosystems, which was held in Kiel in September 1975. Although the third of a series of meetings, it was the first where the word ecosystem stood in the title for a scientific program.

Debating Lapita Stuart Bedford, Matthew Spriggs, 2019-12-12 'This volume is the most comprehensive review of Lapita research to date, tackling many of the lingering questions regarding origin and dispersal. Multidisciplinary in nature with a focus on summarising new findings, but also identifying important gaps that can help direct future research.' — Professor Scott Fitzpatrick, Department of Anthropology, University of Oregon 'This substantial volume offers a welcome update on the definition of the Lapita culture. It significantly refreshes the knowledge on this foundational archaeological culture of the Pacific Islands in providing new data on sites and assemblages, and new discussions of hypotheses previously proposed.' — Dr Frédérique Valentin, Centre national de la recherche scientifique (CNRS), Paris This volume comprises 23 chapters that focus on the archaeology of Lapita, a cultural horizon associated with the founding populations who first colonised much of the south west Pacific some 3000 years ago. The Lapita culture has been most clearly defined by its distinctive dentate-stamped decorated pottery and the design system represented on it and on further incised pots. Modern research now encompasses a whole range of aspects associated with Lapita and this is reflected in this volume. The broad overlapping themes of the volume—Lapita distribution and chronology, society and subsistence—relate to research questions that have long been debated in relation to Lapita.

Serotonin: Molecular Biology, Receptors and Functional Effects FOZARD,SAXENA,2012-02-25 The Second IUPHAR Satellite Meeting on Serotonin was held under the auspices of the Serotonin Club in Basel, Switzerland in July 1990. The scope was wide, ranging from molecular biology through in vitro and in vivo pharmacology to new drug tools and their clinical significance. There were three invited review lectures, by J. M. Palacios, D. I. Wallis and A. Kaumann, and S. Peroutka gave the first Serotonin Club Irvine H. Page Lecture. The rest of the oral programme was put together by the Scientific Organizing Committee based on volunteered research contributions. The invited review lecturers, the platform speakers and selected poster contributors were invited to write up their contributions for inclusion in this volume. Most complied and this book is the result of their efforts. When instructing the authors prior to the meeting, we emphasized that selected new data should be put in the context of the literature findings. In this way we hoped to achieve topicality yet preserve the review perspective which facilitates its appreciation by the non-specialist. It was truly a pleasure to read the interesting papers which resulted and to prepare them for publication. We believe they convey to a remarkable degree the spirit of what was generally felt to be a highly stimulating exchange of information on matters serotonergic which took place in Basel last July.

Elementary Differential Equations and Boundary Value Problems William E. Boyce, Richard C. DiPrima, Douglas B. Meade, 2017-08-21 Elementary Differential Equations and Boundary Value Problems 11e, like its predecessors, is written from the viewpoint of the applied mathematician, whose interest in differential equations may sometimes be quite theoretical, sometimes intensely practical, and often somewhere in between. The authors have sought to combine a sound and accurate (but not abstract) exposition of the elementary theory of differential equations with considerable material on methods of solution, analysis, and approximation that have proved useful in a wide variety of applications. While the general

structure of the book remains unchanged, some notable changes have been made to improve the clarity and readability of basic material about differential equations and their applications. In addition to expanded explanations, the 11th edition includes new problems, updated figures and examples to help motivate students. The program is primarily intended for undergraduate students of mathematics, science, or engineering, who typically take a course on differential equations during their first or second year of study. The main prerequisite for engaging with the program is a working knowledge of calculus, gained from a normal two or three semester course sequence or its equivalent. Some familiarity with matrices will also be helpful in the chapters on systems of differential equations.

Protein Bioinformatics Cathy H. Wu, Cecilia N. Arighi, Karen E. Ross, 2017-02-03 This volume introduces bioinformatics research methods for proteins, with special focus on protein post-translational modifications (PTMs) and networks. This book is organized into four parts and covers the basic framework and major resources for analysis of protein sequence, structure, and function; approaches and resources for analysis of protein PTMs, protein-protein interactions (PPIs) and protein networks, including tools for PPI prediction and approaches for the construction of PPI and PTM networks; and bioinformatics approaches in proteomics, including computational methods for mass spectrometry-based proteomics and integrative analysis for alternative splice isoforms, for functional discovery. Written in the highly successful *Methods in Molecular Biology* series format, chapters include introductions to their respective topics, lists of the necessary materials and reagents, step-by-step, readily reproducible laboratory or computational protocols, and tips on troubleshooting and avoiding known pitfalls. Cutting-edge and thorough, *Protein Bioinformatics: From Protein Modifications and Networks to Proteomics* is a valuable resource for readers who wish to learn about state-of-the-art bioinformatics databases and tools, novel computational methods, and future trends in protein and proteomic data analysis in systems biology. This book is useful to researchers who work in the biotechnology and pharmaceutical industries, and in various academic departments, such as biological and medical sciences and computer sciences and engineering.

Biodiversity Conservation and Phylogenetic Systematics Roseli Pellens, Philippe Grandcolas, 2016-02-24 This book is about phylogenetic diversity as an approach to reduce biodiversity losses in this period of mass extinction. Chapters in the first section deal with questions such as the way we value phylogenetic diversity among other criteria for biodiversity conservation; the choice of measures; the loss of phylogenetic diversity with extinction; the importance of organisms that are deeply branched in the tree of life, and the role of relict species. The second section is composed by contributions exploring methodological aspects, such as how to deal with abundance, sampling effort, or conflicting trees in analysis of phylogenetic diversity. The last section is devoted to applications, showing how phylogenetic diversity can be integrated in systematic conservation planning, in EDGE and HEDGE evaluations. This wide coverage makes the book a reference for academics, policy makers and stakeholders dealing with biodiversity conservation.

Nuclear Magnetic Shieldings and Molecular Structure J. A. Tossell, 2012-12-06 Modern approaches to the theoretical computation and experimental determination of NMR shielding tensors are described in twenty-nine papers based on lectures presented at the NATO ARW. All of the most popular computational methods are reviewed and recent progress is described in their application to chemical, biochemical, geochemical and materials science problems. Experimental studies on NMR shieldings in gases, liquids and solids are also included, with special emphasis placed upon the relationship between NMR shielding and geometric structure and upon tests of the accuracy of the various computational methods. Qualitative MO schemes and semiempirical approaches are also considered in light of the computational results. This is a valuable book for anyone interested in how the NMR shielding tensor can be used to determine the geometric and electronic structures of molecules and solids. (abstract) Modern methods for computing and measuring nuclear magnetic resonance shielding tensors are described in papers by a great number of leaders in the field. The most popular methods for quantum mechanically calculating NMR shielding tensors are reviewed and many applications of these methods are described to problems in chemistry, biochemistry, geochemistry and materials science. The focus of the papers is on the relationship of the NMR shielding tensor to the geometric and electronic structure of molecules or solids.

Franchise Value Martin L. Leibowitz, 2004-07-29 A modern approach to equity valuation Understanding the key ingredients that combine to affect price/earnings (P/Es) is of crucial importance to the investment process. In *Franchise Value*, Martin Leibowitz tackles the imposing task of determining what really has an impact on P/Es. The author shows why he subscribes to the conventional logic that the P/E gauges the market's assessment of the firm's future. He then introduces readers to the franchise-value approach to analyzing the prospective cash flows that determine a company's P/E. The franchise-value approach to valuation enables the analyst or investor to break the firm into two key component parts and to

value those components. The franchise value approach is original and insightful, and with this book, readers can begin to implement this approach to perform better equity valuations. Martin L. Leibowitz, PhD (Stamford, CT), is Vice Chair and Chief Investment Officer at TIAA-CREF, where he is responsible for the overall management of all TIAA-CREF investments. He has authored several books and more than 130 articles, nine of which have received a Financial Analysts Journal Graham and Dodd Award of Excellence.

DoD Building Code (General Building Requirements) Department of Defense, 2016-06-20 If you like this book (or the Kindle version), please leave positive review. This update to UFC 1-200-01 represents the Tri-Services effort to bring uniformity to the military use of non-government model building codes. Technical representatives of each of the four Services developed requirements in this document to implement the use of the 2015 International Building Code (IBC) consistent with the scope of current military requirements and procedures. This UFC applies to the design and construction of new and renovated Government-owned facilities for the Department of Defense (DoD). It is applicable to all methods of project delivery and levels of construction. Includes a list of applicable NIST cybersecurity publications for consideration. Why buy a book you can download for free? First you gotta find it and make sure it's the latest version (not always easy). Then you gotta print it using a network printer you share with 100 other people - and its outta paper - and the toner is low (take out the toner cartridge, shake it, then put it back). If it's just 10 pages, no problem, but if it's a 250-page book, you will need to punch 3 holes in all those pages and put it in a 3-ring binder. Takes at least an hour. An engineer that's paid \$75 an hour has to do this himself (who has assistant's anymore?). If you are paid more than \$10 an hour and use an ink jet printer, buying this book will save you money. It's much more cost-effective to just order the latest version from Amazon.com This book is published by 4th Watch Books and includes copyright material. Health Care Financing and Affordability in the Emerging Global Markets Mihajlo (Michael) Jakovljevic, Kyriakos Souliotis, Wim Groot, 2016-04-14 During the recent few decades, global economic growth has been driven largely by developing world economies. The ones with the most intensive pace of development were marked as “emerging” markets led by so called BRICS and N-11 countries. Such changes inevitably reflected the global health arena. A number of issues previously limited to established high-income economies became popularly discussed topics on the agendas of public health policy makers across these regions. Major challenges remain population aging, rising incidence of prosperity diseases, lack of universal insurance coverage and particularly provision of just and equitable access to medical care among the poor both in urban and rural communities. A significant part of the difficulties faced by these societies are attributed to inefficient resource allocation strategies in health care and unsatisfactory funding strategies. This Research Topic was created in order to address the core challenges of medical care financing and its affordability across the emerging global markets. Contributions of both undergoing or finished original research as well as review style papers are welcomed. All submitted manuscripts should deal with issues relevant to health care economics and policy in recognized global emerging markets. Outside the aforementioned key markets (BRICS- Brazil, Russia, India, China, South Africa; Next 11- Bangladesh, Egypt, Indonesia, Iran, South Korea, Mexico, Nigeria, Pakistan, the Philippines, Turkey and Vietnam) submissions referring to any of the dynamically developing Asian, Latin America, Eastern Europe or MENA countries are encouraged. In addition to a variety of health-economic evaluations and health policy analysis, methodological and resource use studies are within the Topic scope. Health policy considerations should be primarily focused on financing mechanisms and affordability of health care although other surrounding issues such as health insurance, reimbursement and cost-containment strategies will be considered.
